PROFESSIONAL SUMMARY.

Full Stack Developer and Quantitative Analyst proven success in building scalable applications.

EDUCATION

Catholic University of Eastern Africa - Bachelor of Science: Computer Science

PROFESSIONAL EXPERIENCE

- **Android and ML Developer | Muito Incorporation | Remote | January 2023 - April 2023**
 - Co-developed a location-based app with 5,000+ downloads.
 - Implemented facial detection (92% accuracy) and OCR algorithms.
 - Collaborated on cross-platform development with a 6-person team.
- **ICT Officer | National Treasury, Nairobi, Kenya | April 2023 - October 2023-**
 - Developed a file management system that cut document retrieval time by 60%.
 - Implemented network security enhancements, decreasing vulnerability incidents by 75%.
 - Built an automated user access system for streamlined onboarding.
- **Android Developer | FreeCopy Pvt. Ltd | Remote | January 2024 - April 2024**
 - Migrated the backend to Firebase, reducing latency by 35%.
 - Improved UI/UX for mobile apps, increasing engagement by 28%.
 - Delivered features on time in agile development sprints.
- **Systems Developer | PostBank, Nairobi, Kenya | April 2024 - September 2024**
 - Developed, Redesigned and optimized the Helpdesk Ticketing System, reducing resolution time by 40%.
 - Upgraded network infrastructure across 3 offices, boosting connectivity by 25%.
 - Automated system backups with Python, reducing manual effort by 85%.
- **Data Science Intern | Intel Indexer LLC (Remote) | October 2024 - March 2025**
 - Built a supervised ML model for stock prediction (87% accuracy).
 - Developed LSTM models with TensorFlow for time series forecasting.
 - Created interactive D3.js dashboards for financial insights.
- **IT Administrator | Kenyariri & Associates(Law firm) | Nairobi | April 2025 - July 2025**
 - Implemented and configured POS systems to streamline transactions and boost efficiency
 - Built a custom web app for case management and client services
 - Trained and supported staff for smooth system adoption.
- **N8N & Backend Developer | Power Values| Nairobi County, Kenya | October 2025 - Nov 2025**
 - Expanded n8n workflow to handle dynamic, subscription-aware form generation.
 - Designed a small approval UI using Next.js for streamlined workflow management.
 - Built a modular chatbot interface with toggle functionality between AI coaches.
- **FullStack Developer | Safaridesk | Nairobi, Kenya | Nov 2025 - Present**
 - Resolving Critical bugs in the Notifications Engine/Module

KEY PROJECTS

Host3: Web3-based hosting platform built with React, Solidity, and IPFS that enables decentralized file storage and hosting with 99.8% uptime.

Aura3.0: An autonomous AI therapist powered by advanced NLP and emotional intelligence, providing personalized mental health support while ensuring privacy through blockchain technology.

Aqua-Horizon: Citizen science platform that enables users to monitor, report, and discuss water quality issues in their communities.

Flood-Analyzer: A comprehensive flood risk assessment system

Drug-research: A drug discovery and protein-binding prediction tool built with the latest in machine learning and natural language processing (NLP) technology.

ThreadcraftAI: AI-powered content generation tool utilizing GPT models and React that helps users create engaging social media threads with 40% higher engagement rates.

Lingua-Speak: Real-time language translation application built with Next.js and TensorFlow that supports 20+ languages with 95% translation accuracy.

LiveDocs: Real-time collaborative text editor using WebSockets and React that allows multiple users to edit documents simultaneously with conflict resolution.

AidRoute: AI-powered humanitarian logistics platform that combines blockchain transparency with autonomous decision-making to revolutionize global aid delivery.

Safariverse: Immersive 3D platform bridging cultures through African geography and community

TECHNICAL SKILLS

Programming/Web: Python, JavaScript, TypeScript, C++, SQL, HTML/CSS, React.js, Node.js

Data Science & ML: TensorFlow, PyTorch, scikit-learn, spaCy, Apache Spark, Hadoop

Databases: MongoDB, MySQL, PostgreSQL

Cloud & DevOps: AWS, GCP, Azure, Docker, Kubernetes, GitHub Actions, Jenkins, Linux

Other Technologies: Quantum Computing, Network Security, Figma, Adobe XD, Microsoft Office Suite
